

# Arthamatic operater

Ans : arthamatic operater are used to perform arthamatic calculation . c++ provide basic arthamatic calculation . they are + , - , \* , / , % etc

operators	example	Meaning
+	a+b	addation
-	a-b	Substraction
*	A*b	Mutiplication
/	a/b	Division
%	A%b	modulo

## Example

```
#include<stdio.h>

Main(){
    Int a , b , c;
    Printf("enter th a and b value");
    Scanf("%d",&a,&b);
    C = a+b;
    Printf("sum %d",c);
}
```
